

## **Using (MC)I<sup>2</sup> The Relative Law Of Success**

*Need Change? (MC)I<sup>2</sup> Can make you a world leader in your field*

### **Do you or your organization want to experience the quantum development, growth and profits you need to be a world leader in your field?**

In today's complex climate of business, public service and education, the true currencies of success and growth are: **Inspiration, Innovation**, and above all else **Communication**. Without these currencies, everything just becomes management of the status quo and you never see the quantum growth you are fully capable of. You wonder how some organizations always seem to come up with unique solutions, become fortune 500 companies or one of the top 100 employers in your industry.

### **What do you need to be extremely successful?**

People and organizations that thrive on excellence maximize the currency of success from the most powerful computers in the universe, the Human Mind. Are you maximizing the full mental potential of all your employees? Outstanding organizations use systems that follow **(MC)I<sup>2</sup> The Relative Law Of Success** which states: "Your development, growth and profits are directly related to your Maximization of a superior Communication process, multiplied by the utilization of (Inspiration and Intuition)<sup>2</sup> to create Innovations". Innovation is the creation of that which did not exist before and it can make millions in profit virtually overnight. Everyone has virtually the same brain, but how we use them in a focused process, makes all the difference in the world. Learn how to build and utilize a superior communication process with your staff in a solution finding process that activates the inspiration and intuition to innovation chain reaction process. Then focus the energy of this chain reaction, in a guided holistic process creating the synergy needed for outside the box or quantum leap solutions and profits. Because **(MC)I<sup>2</sup>** is an open process, it can be used in any situation where innovation is desired. It can be used to: open new avenues of revenue, revitalize or create new mission and vision statements, to maximize your current profits or find solutions to virtually any issue. All presentations and training sessions are customized to your organization before they are delivered and follow up evaluations to monitor your progress at 3, 6 and 12 months are included in our fee. Our company HelpingU is like a portable Human Resource Department because when we deliver a program we always follow up and mentor your success.

The **(MC)I<sup>2</sup>** training sessions are delivered in customized modules based on your organizational needs. As part of our corporate social responsibility program we donate 10% of all presentation and training fees to a charity of our client's choice and short presentation fees are waived for nonprofit or charitable organizations.

Einstein said "The significant problems we have cannot be solved at the same level of thinking with which we created them" If your ready to see how **(MC)I<sup>2</sup>** creates a new level of thinking for your organization, we are ready to show you how to get there.
